CPH:LAB is CPH:DOX' own pioneering laboratory-style talent development and production scheme for international filmmakers. Since 2009 this yearly training initiative has focused on exploring new, innovative creative processes in development and production, supporting alternative collaborative partnerships between filmmakers across borders and encouraging new financing methods with focus on cross-sector partnerships and market access. Each year 20 talented filmmakers are handpicked, paired in tandems, invited to a ten-day workshop in CPH and offered a grant to make a film together.
